“ My wife was diagnosed of Parkinsons disease 2 years ago, when she was 62. She had a stooped posture, tremors, right arm does not move and also a pulsating feeling in her body. She was placed on Sinemet for 6 months and then Siferol was introduced and replaced the Sinemet, I took her off the Siferol (with the doctor’s knowledge) and started her on PD-5 protocol we ordered from Uine Health Center, her symptoms totally declined over a 8 weeks use of the PD-5 protocol. She is now almost 63 and doing very well, the disease is totally reversed! We got the treatment from their website, uinehealthcentre. net, or by Googling Uine Health Center
