“ *Steve Cramer was absolutely one of the most talented engineers that I have worked with during my 30+ year career. I worked with Steve in the late 90's and 2000's in Alabama when Steve was with Toshiba Medical. Steve's attitude and sense of humor made even the most undesirable projects a positive experience to all those around him. His relentless push for excellence and pursuit of perfection made a difference in the lives of so many patients. Steve was a source of knowledge and understanding as well as a good friend that was always willing to help others in any way that he could. His friendship and humor will be missed.*
